

PRACHI RANDERIA

SOFTWARE DEVELOPER

+91 9324396060

prachi.randeria@gmail.com

Mumbai, India

[/prachi-randeria](#)

Software Engineer II with hands-on experience building and scaling cloud security and backend systems using Python, AWS, and Terraform. Strong background in CI/CD automation, cloud infrastructure, and performance optimization. Former Google intern with a proven ability to deliver reliable, secure, and high impact software in production environments

RELEVANT SKILLS

- **Programming Languages:** Python, Java, C++, C
- **Backend & APIs:** REST API Design, Flask, Django, System Design
- **Cloud & DevOps:** AWS, Terraform, Jenkins, Docker, SonarQube, Puppet
- **Databases:** MySQL, SQLite, Firebase
- **Web Technologies:** HTML, CSS, JavaScript, Bootstrap
- **Tools:** Git, Shell Scripting, Postman

WORK EXPERIENCE

SOFTWARE ENGINEER II

Forcepoint

July 2023 - Present

- Developed and maintained cloud security products including **Cloud Firewall, Mobile Firewall, and FlexEdge** using **Python, AWS, and Terraform**.
- Built, enhanced, and migrated **CI/CD pipelines** from on-prem **Jenkins** to cloud-hosted Jenkins, improving code quality by ~40% with help of **SonarQube**, and reducing time to merge by 1 hour.
- Performed **performance and load testing** on mobile firewall infrastructure, identifying issues that caused up to 25% error rates under high load.
- Contributed to **Python-based proxy services** within **Cloud Security Gateway**, **strengthening backend scalability, security, and performance**.

APPLICATION ENGINEER INTERN

Google, India

June 2022 - August 2022

- Developed a tool to visualize **code metadata dependencies** using **Salesforce Metadata API**, integrating with **PLX tables** and creating an interactive, drillable, and filterable dashboard.
- Utilized **JavaScript** to write custom code in PLX, optimizing data filtering, sorting, and performance for enhanced user experience and efficiency.

CO-FOUNDER

T-Space

March 2021 - September 2021

- T-Space is an initiative which aims at encouraging and **promoting mental health** and psychological well-being by providing affordable therapy sessions to students.
- Developed the backend of the platform using **Flask** and **Firebase**, ensuring smooth user experience and reliable session management.

FULL STACK DEVELOPER INTERN

Vishwa Solutions

April 2021 - June 2021

- Developed a **web application** for managing meetings, tasks, and assignments for employees using **Java**, **Spring Boot**, and **MySQL**.
- Contributed to both **front-end** and **back-end** development, ensuring seamless integration and efficient database management for improved workflow and productivity.

PROJECTS

SMART SOCIETY

- Smart Society leverages **IoT technology** to automate daily tasks within a housing society, enhancing security, reducing manual labor costs, and optimizing resource management.
- Built with React Native(front-end) and Django (back-end), the app features user management, real-time notifications, and resource allocation, streamlining operations and enhancing user experience.

BRAIN TUMOR DETECTION AND CLASSIFICATION

- BTD is a web-based platform designed to automate brain tumor detection in patients using Convolutional Neural Networks (**CNN**).
- Built with Python, Flask, TensorFlow, and OpenCV, the website features an intuitive interface using HTML, CSS, JavaScript, and Bootstrap, with SQLite for database management.

DAILYCUP - NEWS AGGREGATOR

- DailyCup is a website that aggregates the latest news articles from various channels using **web scraping**.
- Built with a Django backend, HTML, CSS, JavaScript, and Bootstrap for the front-end, and SQLite for database management.

EDUCATIONAL HISTORY

BTECH IN COMPUTER SCIENCE

Mumbai University | 2019 - 2023

CGPA - 9.39

CERTIFICATIONS

AWS CERTIFIED CLOUD PRACTITIONER

Passed January 2024
